
Our Mission

is to support communities by connecting the distressed with lasting resources for the physical, social and spiritual well-being of all. We do this by building understanding and alliance between people of all walks of life, fostering resilience, breaking down walls of isolation of belief systems, and opening doors to change and mutual growth.

We Value

relationships, building bridges of understanding, the human spiritual journey, connection with the natural world, and mutually supported growth.

Our Vision

is empathetic, well-balanced communities in which people are valued, hostilities are lost, and people understand one another at deep levels, leading to a safer and more hospitable world.
